Image Review Submission Guidelines

www.SCAI.org Clinical Interest Sections

The Society for Cardiovascular Angiography and Interventions Foundation (SCAI) invites the interventional /invasive cardiology communtiy to participate in the SCAI.org Clinical Interest Sections by submitting original clinical case studies for publication.

The goal of the SCAI.org Clinical Interest Section Image Review is to provide a channel for the interventional / invasive cardiology community to share knowledge and experiences, and promote dialogue of the best patient treatment options. We value and encourage your participation. Thank you for your interest in submitting an Image Review presentation to the SCAI.org.

Submission Process

1) Assemble Your Presentation

Download the Image Review Power-Point template from:
www.SCAI.org/CISImageTemplate

The template includes:

- Instructions for recording audio narration for your PowerPoint presentation.
- Instructions for optimizing the media in your presentation, or zipping your presentation and accomanying files.
- Instructions for uploading your presentation for submssion.

2) Submit Your Presentation

Instructions for packaing and uploading your presentation for submssion are included in the Image Review PowerPoint template, which can be downloaded from www.SCAI.org/CISImageTemplate.

3) Review by SCAI.org Clinical Interest Section Editors

Upon submission of your www.SCAI.org Image Review Submission, your presentation will be reviewed by the Section Editor(s) of Clinical Interest Section you are submitting your presentation to. Editors may provide edits and suggestions for your presentation.

Once your presentation is approved by SCAI.org Editors, your presentation will be published on www.SCAI.org.

Image Review Requirements

Guidelines and requirements for Image Review submissions are as follows:

Author Information

The following information is required to properly identify and correspond with the author(s): the name of physician who performed the case, the author's title, medical institution and a color photo of the author in JPEG, PNG, or GIF file format to be included in the online presentation.

No Patient Information

Do not include any identifiying patient information in the images or text used in your presentation.

List of Medical Products

Include a list of medical products pertinent to the treatment or procedure in the case. The decision to use a specific product or device is important for readers seeking to better understand why a particular treatment or technique was chosen. The list should be in alphabetic order with the following format: Manufacturer, Product name, Product specifcations.

Clinical Question(s)

The SCAI.org Image Review is designed to lead a reader through all or part of an author's decision-making process in a clinical case, by including at least one interactive question and answer.

Example:

> *What test would you perform next?*
>
> *A. (possible, but wrong, next step)*
> *B. (best answer, the author's next step)*
> *C. (possible, but wrong, next step)*
> *D. (possible, but wrong, next step)*

The rationale for the answers will then be provided for the reader with an explanation for the best answer and a brief explanation for each incorrect/ less preferred answer.

Possible question topics include:

- What is the reader's initial hypothesis about the patient's condition and/or treatment strategy appropriate for this patient?
- Which particular diagnostic tests should be performed?
- Given diagnostic results from one or more tests, what would be the next course of action?
- Within the process of treating a patient, how would the reader respond to a particular complication?
- What follow-up protocols and associated medical therapies would the reader offer after discharge from the procedure?

View examples of Image Reviews on www.SCAI.org.

Questions? Please contact Kimberly Pong at kpong@scai.org or (202) 683-9183 with Image Review submission questions.
