Medical history and/or physical exam reveal you are at risk for PAD.

- **NO**
  - PAD is unlikely, so consider other explanations for the symptoms.

- **YES**
  - Ankle Brachial Index (ABI)
    - Less than 0.9
      - PAD
    - Greater than or equal to 0.9
    - Greater than or equal to 1.30
      - Schedule more testing: segmental pressures (PVR) and treadmill test
      - Still suspicious?
      - Schedule more testing:
        - Duplex Ultrasound, Computerized Tomographic Arteriography (CTA),
        - Magnetic Resonance Angiogram (MRA) or angiogram
