OVERVIEW

Invest in the Future of Interventional Cardiology at the 2026 Fellows Courses

No other interventional cardiology fellows course attracts as many interventional trainees as the SCAI Fellows Courses. Attending presents an excellent opportunity for your company to build relationships with tomorrow's leaders and decision-makers.

The Fellows Courses will provide an engaging and collegial environment in which attendees can interact with internationally recognized faculty. Attendees will gain an in-depth knowledge of indications, techniques, and expected outcomes for coronary, peripheral, structural, and congenital interventions. The program will present a variety of practical case-based content of immediate value to attendees as they plan their post-fellowship practices.

The Fellows Courses are your opportunity to demonstrate your company's offerings to interventional cardiology fellows specializing in adult, congenital, structural, and peripheral interventions as they plan their post-fellowship practice.

Satellite Symposia Guidelines

SCAI's industry partners have the opportunity to conduct educational programming to highlight important topics such as pharmacologic and device treatment modalities or diagnostic techniques. Fellows Courses offers half-day, morning, lunch, and evening satellite symposia opportunities.

APPLICATION PROCESS AND DEADLINE

All satellite symposium proposals can be submitted using the online [satellite symposium application form](#). Only completed applications accompanied by payment will be considered. The application and all required documentation must be completed and sent to SCAI by **October 13, 2026**.

ACCEPTANCE AND APPROVAL OF SYMPOSIUM APPLICATION

The applications will be reviewed on an ongoing basis. The program provider will be notified of a symposium's acceptance within ten days of submission of application. Acceptance of all applications will be dependent on availability. Time slots are designated on a first-come, first-served basis, and requests for specific days are honored to the extent possible.

REVIEW PROCESS

All applications will be submitted to the Fellows Courses Program Committee for review. The review process is designed to ensure that the approved symposium meets the educational needs of the interventional cardiology fellow, presents a variety of topics, and does not duplicate the educational content of the Fellows Courses. Criteria include:

- Program objectivity, balance, and scientific rigor. Your program proposal will not be accepted if it is judged to be promotional rather than educational.
- The extent to which the program proposal meets the educational needs of meeting attendees. Content should be presented at the highest level of sophistication.
- The extent to which the program proposal presents a variety of topics.
- The extent to which the program proposal complements the overall educational content of the meeting.

If approved, all revisions to a symposium's content or format must be communicated to SCAI in writing.

SATELLITE CANCELLATION POLICY

On or before **October 19, 2026**, the supporter will receive a refund of 50% of their satellite fee. After October 19, 2026, there is no refund of the satellite fee, and the supporter will be responsible for 50% of the food and beverage costs incurred by SCAI for this session if the satellite session time is not resold.
